

Itamar Tuby

I **design and ship products end-to-end** — from art direction and UX to production React Native, full-stack Next.js, and multi-model AI systems. Ten years of design craft, now paired with the ability to build the thing myself. Founder of **OnZero** and **Doodi**.

CAPABILITIES

DESIGN

- Product / UX·UI
- Art Direction
- Design Systems
- Branding
- Prototyping
- Figma
- Photoshop
- Illustrator
- InDesign
- Spline 3D
- Blender

ENGINEERING

- TypeScript
- React
- React Native · Expo
- Next.js 14
- Node.js
- TailwindCSS
- Prisma · PostgreSQL
- Supabase
- Zustand
- React Query
- REST APIs

AI & SYSTEMS

- Generative AI
- OpenAI
- Anthropic Claude
- Google GenAI
- fal.ai
- Prompt & pipeline design
- MCP servers
- BullMQ · Redis
- Docker
- Cloudflare R2 · S3
- Stripe

TARGETING

- 01 **Founding / Product Designer**
AI & 0→1 startups
- 02 **Design Engineer / Product Engineer**
design + React / React Native
- 03 **AI Product Designer**
generative-AI products
- 04 **Frontend / React Native Engineer**
product-minded

EDUCATION

H.I.T — Holon Institute of Tech.
Diploma, Digital Interactive Design
2018 – 2020

New Media Campus
Digital Marketing
2018

LANGUAGES

Hebrew — native · **English** — fluent

SELECTED WORK

OnZero — Founder & Product Builder 2024 – Present
Independent · full product owner (design + engineering)

An AI platform for DNA-locked, hyper-realistic human models that replace commercial photoshoots — one consistent character generating on-brand images, video, and voice across entire campaigns.

- Designed and built the entire product solo — **brand, UX/UI, design system, and a production full-stack app** (Next.js 14 App Router, TypeScript, TailwindCSS).
- Architected a **multi-provider generative-AI pipeline** across OpenAI, Anthropic Claude, Google GenAI, fal.ai and BytePlus for image / video / audio, with a character "DNA-lock" system that keeps identity consistent across every render.
- Engineered async media workers on **BullMQ + Redis** in Docker; PostgreSQL via Prisma; media on Cloudflare R2 (S3); sharp / ffmpeg processing.
- Shipped **Stripe subscriptions + a credit-based billing system**, NextAuth, PostHog analytics, and localization to 10+ languages.
- Exposed the platform as an **MCP server with Claude Skills**, plus a node-based visual creative-workflow editor (React Flow) and automated brand-kit generation.

stack Next.js 14 · TypeScript · React · Tailwind · Prisma/Postgres · BullMQ/Redis · Docker · Cloudflare R2 · Stripe · OpenAI · Anthropic · Google GenAI · fal.ai · MCP

Doodi — Founder & Lead Product Engineer SUNSET · BUDGET 2024 – 2025
Independent · design + mobile engineering

A production mobile app for building & HOA management — tenants, boards and vendors in one place. Designed, built, published to the App Store, and run in production until it was wound down in late 2025 for budget reasons.

- Designed and shipped a cross-platform **React Native (Expo) app in TypeScript with 25+ feature modules**: maintenance & issue tickets, payments, budgets & financial reports, voting, parking, amenities booking, a vendor marketplace, smart entry and security cameras.
- Built **multi-role experiences** (tenant / board / vendor / super-admin) on **Supabase** (auth, Postgres, storage) with Zustand and react-hook-form.
- Implemented **full Hebrew RTL + multi-language i18n**, push notifications, EAS builds with over-the-air updates, secure Keychain storage, and in-app payments.

stack React Native · Expo · TypeScript · Supabase · Zustand · React Navigation · i18next · EAS · Push Notifications

Art Director · Clarity 2023 – Present
Berlin · marketing for tech & knowledge-based brands

- Own the **creative vision and execution** — brand systems, campaign art direction and design delivery for tech clients.

Product Designer & Art Director · Freelance 2022 – Present

- New identity & branding for the beauty clinic brand **618 Clinics**; product UX for the collectors' platform **Rarely**; UX/UI design and management build for **ARTOP** (now *ai.ar*).

EARLIER — AGENCY DESIGN

McCann — Digital Art, Studio 2020 – 2022

Dar Digital — Art Director & Performance 2018 – 2020
